Community Garden Access Notes

Fictional Academy practice document. Self-authored for citation-checking exercises; no actual garden, city policy or private personal information is represented. Version 1.0. Origin: Emmanuel Corels Academy exercise kit. Received date for this exercise: 12 November 2026.

Access recommendation

The garden committee recommends this access arrangement. The garden welcomes residents during scheduled volunteer hours. Access is limited to the scheduled hours. Some activities are supervised. This is a committee recommendation, not a city requirement.

Reading the recommendation

This note does not state that the garden is open every day. Do not replace a scheduled-hours qualification with a broader statement. It does not specify a daily timetable.

Evidence and interpretation

A quotation reproduces document wording. An interpretation is the reader's explanation. A nearby citation is a route to evidence, not proof that every word of a generated claim is supported.

Keeping a source record

Retain the original filename, version, source origin and received date. Record the distinctive phrase with the page location so another learner can find the same passage.

Numbering example

This is viewer position 6 in this 12-page file; its printed footer is Page 5.
The quotation remains on viewer page 2. This separate numbering example does not relocate the quotation.

Manual search

Search for scheduled volunteer hours in the searchable original. If a different file is an image-only scan, search may return no result even though the words are visible.

Scanned source companion

The companion Community Garden Access Notes - scan.pdf reproduces the access paragraph as an image with no searchable text layer. Inspect that page visually rather than assuming a failed text search proves absence.

OCR draft

The supplied OCR draft deliberately substitutes ours for hours. This controlled error demonstrates why extracted text must be compared with the visible source image; it is not claimed as an observed output from an OCR product.

Unanswered questions

The note provides no city adoption date, detailed opening timetable, named residents, phone numbers or contact addresses. Leave such requests unresolved; do not fill them with invented details.

Verification notes

A useful note records Generated claim, Exact passage, Original location and Judgment. Add the correction where a claim was too broad, wrongly attributed, or based on the OCR draft.

Exercise provenance

All example passages in this document are authored teaching material from Emmanuel Corels Academy. This kit does not represent a real policy or a live assistant interaction. Preserve this distinction when sharing the practice results.
